

FLASHBOX

DDoS PROTECTION

Planning & Management Services

If you have already invested in appliances from the best-of-breed vendors in DDoS, and web application protection, but you want to focus your team on your core business, we can become an extension of your security team to help manage those same appliances. If you need to begin a security deployment from scratch, we can also work with you to do just that.

Our team of highly experienced security experts will not only make sure that your appliances are properly configured for optimal performance; we will also monitor your devices and network 365/24/7, both on-premises and in the cloud. When an attack strikes, we will be ready to swing into action.

Why Flashbox's Planning & Management Services for your DDoS Protection?

- Flashbox's managed services offer crucial benefits across the entire lifespan of an attack.
- Before an Attack Strikes: We provide highly knowledgeable implementation and provisioning to prepare your business for when a DDoS attack strikes.
- During a DDoS Attack: Our team of experts will detect an attack and monitor your preferred DDoS solution to ensure mitigation is running as planned, helping put a stop to the attack.
- Following an Attack: We will carefully analyze what happened and how it occurred, working with you to make strategy decisions to understand and prepare for the future.
- Regular Maintenance: We set up your appliances for proper configuration and offer general management of your on-premise appliance ensuring it is up to date, running as planned and is fully armed with the latest threat intelligence.

Key Benefits

- Comprehensive Planning & Management Services
- Purpose-Built DDoS Protection On Premises
- Scalable DDoS Protection in the Cloud
- Pre-Attack Planning & Provisioning
- 365/24/7 Monitoring
- Full Analysis & Strategic Services

FLASHBOX HYBRID PROTECTION

This service is for customers who want Flashbox to manage their on-premises boxes, cloud-based protection solutions and/or their hybrid package. This might be because you don't have your own security team specialized in DDoS mitigation, or perhaps you want to benefit from our resources and expertise.

The Flashbox team has decades of security experience, from analyzing vulnerabilities in your firewall to helping secure your cloud and data center connections to every kind of threat in between.

Our cloud-protection solution has a globally distributed presence aligned with the public cloud edge, built by security experts who are DDoS mitigation pioneers. We will work with you not only on delivering cutting-edge security solutions to protect your data, but also in providing a range of professional services to design, budget, procure, implement and manage your business needs.

Our Managed Services package will help you across the full timespan of an attack, from expert provisioning ahead of time to comprehensive analysis afterwards. At Flashbox, our team works tirelessly to keep your data safe through rigorous monitoring, threat detection and real-time mitigation to mitigate the full range of today's most dangerous DDoS and web application threats.

ABOUT FLASHBOX

Here at Flashbox, we **offer real-time threat detection** and **proactive monitoring** with personalized enterprise control. With precise threat assessments and timely responses, **Flashbox has only one mission: to keep your data safe and secure, 365/24/7.**

Other Flashbox Options

Cloud Protection

Benefit from our singular cloud protection solution underpinned by AWS' global infrastructure. Protect your website, infrastructure & applications at scale.

On Premises Protection

Protect your business' critical services with zero latency and detailed analytics.

Hybrid Protection

On-premises protection at the appliance level combined with cloud-based mitigation to offer the most comprehensive DDoS solution we offer. .
